We are yacht builders, creators of dreams.

HISTORY

For over than 35 years, PRESTIGE has been offering its customers precious moments at sea by building yachts with a unique design and concept.

Constantly reinventing and perfecting exceptional industrial know-how, PRESTIGE is now developing a whole new generation of flybridge yachts to meet its customers' needs.

This new generation is built on the heritage of the PRESTIGE F-LINE, features exciting improvements, such as innovative interior and exterior designs, high-end fittings, and an unrivaled level of fit and finish.

INTRODUCTION

With over 40 models developed over the last 35 years, the F-LINE occupies a privileged place in the world of yachting.

The design concept of this product range is based on a unique layout maximizing space and light. Fine materials and high-quality finishes attest to the exacting standards and savoir-faire of PRESTIGE. Both on the interior and on the exterior, the refinement, soft atmosphere, and Art de Vivre gently unfold, in close connection with the sea and the natural elements.

The F4.9 is the first model of a new generation and perfectly embodies a significant evolution in the motor yacht segment between 40 and 70 feet, where PRESTIGE is the market leader. She brings stunning innovations to meet client expectations while remaining true to the brand's personality.

Erwin BAMBS, PRESTIGE Vice President

“ The New Generation perfectly represents the evolution in the PRESTIGE design and layout. ”

Camillo GARRONI

PRESTIGE has always prioritized volume, comfort, bright interiors and innovative layouts in the design and creation of motor yachts for its customers.

The new F-LINE generation, designed by Garroni Design, is built on the heritage of the PRESTIGE F-LINE, features exciting improvements, such as innovative interior and exterior designs, high-end fittings, and an unrivalled level of fit and finish. The new generation remains focused on family yachting, with clever details and an exceptional layout.

Michael Peters

“ The hull design began with the desire to improve comfort and seakeeping with the integration of cambered surfaces. These complex convex forms provide a smoother riding hull, stronger resistance and allows for a fuller bow section that improves interior volume. ”

“ The French Riviera, where the sea reflects the colors of the facades, the sky and nature. This iconic region inspired the new F-LINE generation design, refined lines and minute details. ”

Valentina Militero De Romedis

TIMELESS ELEGANCE

Inspired by the movement of water, the fluid and elegant exterior lines of this new hull blend with polished surfaces in living areas, reflecting copious natural light.

The new **fashion plate**, located on each side of the yachts, appears as a strong brand marker of this new generation. Its four backlit stainless steel flames illuminate the new generation and affirm the strong identity of PRESTIGE.

SAME PERSONALITY, NEW INTERPRETATION

PRESTIGE reinvents the exterior and interior layouts of its yachts, offering customers maximum comfort to savor convivial moments with friends and family at sea. The OceanView galley and the location of the owner's suite are defining features of this new generation.

The new, fully equipped **OceanView galley** is at the heart of the life on board, offering more space to expand social experiences. With its transversal orientation, it looks out toward the cockpit and the open sea. This brand-new galley opens directly onto the exterior through a wide-opening glass window.

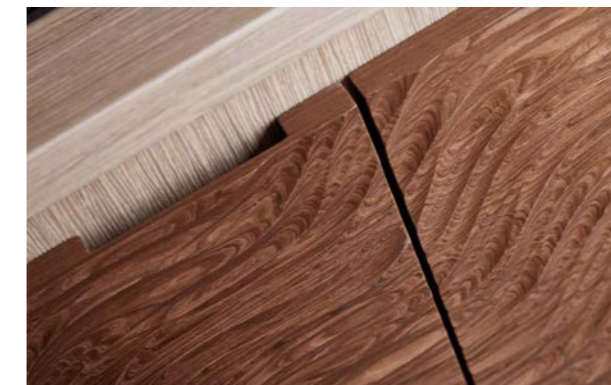

The **semi-main deck master** suite boasts exceptional interior volume and the forward location affords much more privacy, and provides better insulation from sound, far from the engine room and the dock. It offers a quiet, peaceful, intimate living space for the owner, conducive to reflection, or simply rest.

REFINED FIT AND FINISH

The sleek design highlights fine details, noble materials, and polished finishes for a perfect combination of comfort and elegance, evoking a feeling of serenity. The smooth atmosphere on board makes passengers feel connected to the sea, omnipresent in the interior wherever they look.

Each surface, each curve has been sculpted to create **elegant lines** with exceptional finishes, reminiscent of the movement of water. The gentle curves of its design unfold in connection with the sea and the elements to create a gentle, soothing atmosphere.

CUTTING-EDGE TECHNOLOGY ON BOARD

New F-LINE models offer a **concentration of technology and innovation on board**, for the owner to benefit, carefree, from ease of use and maximum comfort. For intuitive cruising, exceptional maneuverability, and peace of mind, state-of-the-art solutions are installed on board, while the stabilizer ensures the comfort of all on board.

“ An eco-responsible attitude with a high level of commitment. ”

PRESTIGE is working with an environmentally responsible approach throughout all phases in product design, development, and construction, and throughout organization. PRESTIGE also aims to enable owners to feel closer connection with nature aboard their yachts.

INFUSION
Which traps solvents and prevents release of volatile organic compounds into the air. Core materials made for recycled plastics.

ECOLOGICAL PRODUCTS
Varnishing: low level of solvents and curing by UV lamps.

SUSTAINABLE WOOD
Sourced from responsible management of the world's forests.

NATURAL MATERIALS
Fair-trade, bio/organic materials for bedding.

CERTIFIED SUPPLIERS
Use of recycled materials that contain sustainable components and are manufactured in an environmentally friendly manner. Recovery of drinking water and Purified emissions - purification of 99% of impurities.

RECOGNIZED LABELS
Certified for the quality of conception and construction, for environmental protection.

“ Combine ecology and economy. ”

ECO DRIVE
Significant reduction in exhaust emissions: 30% less fuel consumption and 40% more autonomy.

SERENITY
Industry-leading 10-year warranty on the structure and 3-year comprehensive warranty

The search for committed, ecologically sensitive partners: a high-end, ethical and organic alliance.

An engine system that provides maximum power and maneuverability while reducing fuel consumption.

Trust and reliability: worldwide renowned certifications and a world-class warranty.
